

# EARTH WEEK CELL PHONE COLLECTION

## CAMPAIGN APRIL 19TH - 26TH

### Help Others:

Donating your working cell phone or PDA benefits your community.

More than 100 million cell phones are no longer used annually. If we recycled all of them, we would save enough energy to power 194,000 U.S. homes for a year.

## OLD CELL PHONES? DON'T TRASH 'EM OR STASH 'EM!

Did you get a new cell phone? Wondering what to do with your old one? Don't drop it in a drawer or stuff it in the glove compartment!

### Why Recycle

#### PROTECT YOUR ENVIRONMENT:

Recycling your cell phone helps the environment by saving energy and keeping usable materials out of our landfill. Cell phones and PDAs are made of precious metals, copper, and plastics, all of which require energy to mine and manufacture. Recycling not only conserves these materials, but prevents air and water pollution and greenhouse gas emissions.

#### PREPARE FOR RECYCLING:

Three things to remember:

- Terminate your service
- Clear your phone's memory of stored information
  - conduct a hard reset by following the directions from your wireless carrier or the product manual OR
  - using data erasing tools that are available on the web.
- Remove your SIM card

For more information, contact your network provider, cell phone manufacturer, or NextStep Recycling, at 686-2366 <[www.nextsteprecycling.org](http://www.nextsteprecycling.org)>
